Population of tigers in the country

1438. SHRI D. RAJA: Will the PRIME MINISTER be pleased to state:

(a) whether it is a fact that the National Tiger Conservation Authority has estimated that the present number of tigers in the country is only 1,411 against an earlier estimate of 3508; and

(b) if so, the details and Government's reaction thereto?

THE MINISTER OF STATE IN THE MINISTRY OF ENVIRONMENT AND FORESTS (SHRI S. REGUPATHY): (a) and (b) The recent All India Estimation of tiger undertaken by the Ministry of Environment and Forests through Project Tiger (now the National Tiger Conservation Authority) in collaboration with the Wildlife Institute of India, has indicated the total country-level population of tiger is **1411** (mid value); the lower and upper limits are **1165** and **1657** respectively. The details are given in Statement (*See* below). The recent assessment of tiger population is based on determining spatial occupancy of tigers throughout potential tiger forests and sampling such forests using camera traps in a statistical framework. This assessment is not comparable to the earlier total count using

pugmarks owing to several shortcomings in the latter. The new findings indicate a poor status of tiger population in areas outside tiger reserves and protected areas. The tiger population, by and large, in tiger reserves and protected areas of such States are viable, while requiring ongoing conservation efforts.

Statement

Forest occupancy and population estimates of tiger as per the refined methodology

State	Tiger Km²	Tiger Numbers		
		No.	Lower limit	Upper limit
1	2	3	4	5
Shivalik-Gangetic Plain Landscape Complex				
Uttarakhand	1901	178	161	195
Uttar Pradesh	2766	109	91	127
Bihar	510	10	7	13
Shivalik-Gangetic	**5177**	**297**	**259**	**335**
Central Indian Landscape Complex and Eastern Ghats Landscape Complex				
Andhra Pradesh	14126	95	84	107
Chhattisgarh	3609	26	23	28
Madhya Pradesh	15614	300	236	364
Maharashtra	4273	103	76	131
Orissa	9144	45	37	53
Rajasthan	356	32	30	35
Jharkhand**	1488		Not Assessed	
Central Indian	**48610**	**601**	**486**	**718**
Western Ghats Landscape Complex				
Karnataka	18715	290	241	339
Kerala	6168	46	39	53
Tamil Nadu	9211	76	56	95
Western Ghats	**34094**	**412**	**336**	**487**
North East Hills and Brahmaputra Flood Plains				
Assam*	1164	70	60	80
Arunachal Pradesh*	1685	14	12	18
Mizoram*	785	6	4	8
Northern West Bengal*	596	10	8	12

1	2	3	4	5
North East Hills, and Brahmaputra	4230	100	84	118
Sunderbans	1586		Not Assessed	
Total Tiger Population		**1411**	**1165**	**1657**

* Population estimates are based on possible density of tiger occupied landscape in the area, not assessed by double sampling.

** Data was not amenable to population estimation of tiger. However, available information about the landscape indicates low densities of tiger in the area ranging from 0.5 to 1.5 per 100km²

Action plan for cleaning the rivers

†1439. SHRIMATI SUSHMA SWARAJ: Will the PRIME MINISTER be pleased to state:

(a) whether it is a fact that an action plan has been formulated to clean and to make the rivers of the country pollution free;

(b) if so, the details of the rivers included in this plan; and

(c) whether any time limit has been fixed to clean up these rivers?

THE MINISTER OF STATE IN THE MINISTRY OF ENVIRONMENT AND FORESTS (SHRI NAMO NARAIN MEENA): (a) and (c) Under the Centrally Sponsored Scheme of National River Conservation Plan (NRCP), pollution abatement works are implemented to improve the water quality in the identified polluted stretches of major rivers. These works include interception and diversion of raw sewage flowing into the rivers, setting up of Sewage Treatment Plants for treating the diverted sewage, creation of low cost sanitation facilities, setting up of electric/improved wood crematoria and River Front Development among others. The works are implemented through Implementing Agencies nominated by the State Governments for the purpose. Presently, NRCP covers pollution abatement works in 164 towns along polluted stretches of 35 rivers spread over 20 States at an approved cost of Rs. 4863.75 crores. The details of the rivers and the States covered under the Plan are given in Statement (*See* below).

Conservation of rivers is a dynamic activity with the ever increasing pollution load due to rapid urbanization and increase in population. Review of the strategies of conservation policy and identification of additional towns and rivers is a continuous process. Due to continuous increase in the population of the towns located along the banks of the rivers resulting in increased pollution load, and gap in the availability of financial resources to take up works commensurate with the requirements, there is likely to be persistent divergence between the tackled pollution load and the actual pollution load.
